

## Spectralink DECT Server Interoperability

The interoperability table applies to Spectralink IP-DECT Server 400 and 6500 as well as Spectralink DECT Server 2500 and 8000.

| PBX Manufacturer | Protocol Overview | PBX Type                        | HW Version                  | SW Version     |
|------------------|-------------------|---------------------------------|-----------------------------|----------------|
| Adtran           | SIP               | Adtran Netvanta UC Server       |                             | 4.4            |
| Alcatel          | SIP               | OmniPCX Enterprise              |                             | R9.1 i1.605.15 |
| Alcatel          | SIP               | OmniVista 4760i                 | Alcatel OXE System 0006A56B | 10.1           |
| Avaya            | SIP               | Aura Session Manager            |                             | 6.0 SP1        |
| Avaya            | SIP               | Avaya                           | CS1K                        | 6.0            |
| Avaya            | SIP               | Avaya                           | SCS500                      | 2.0            |
| Avaya            | SIP               | IP Office                       |                             | 8.1            |
| Brekeke          | SIP               | Brekeke                         |                             | 2.4.5.5        |
| BroadSoft        | SIP               | BroadSoft                       |                             | R18            |
| Cisco            | SIP               | UC500 Series                    | UC520W-8U-2BRI-K9           | 12.4(20)T2     |
| Cisco            | SIP               | CUCME                           |                             | 7.0            |
| Cisco            | SIP               | CUCM                            |                             | 8.6.2          |
| Cisco            | SIP               | CUCM                            |                             | 8.0.2          |
| Cisco            | SIP               | CUCM                            |                             | 7.1.2          |
| Cisco            | SIP               | CUCM                            |                             | 7.0            |
| Cisco            | SIP               | CUCM                            |                             | 6.1            |
| Deltapath        | SIP               | frSIP Video & Voice UC Platform | T256/T512, T256-S/T512-S    | 2.8.8 or above |
| Digium           | SIP               | Asterisk                        |                             | 1.4.18.1       |
| Ericsson         | SIP               | Ericsson MX1                    | MX1                         | 3.1            |
| Epygi            | SIP               | Quadro 4x                       |                             | 5.1.18         |
| Innovaphone      | SIP               | IP6000                          |                             | 9.00           |
| IPitomy          | SIP               | IPitomy                         |                             | 4.8.1          |
