

# VXi VEHS Electronic Hook Switch

## Answer calls remotely, at the touch of a button.

Now you can answer and end calls, up to 300 feet from your phone. The ringtone in your VXi V150 or V100 headset lets you know when you have a call, and you just touch the headset's answer button to answer. To end the call, just touch the button again. The VEHS does all of the work.

V150 with Optional EHS Installed

VEHS-A1

- Answer and end calls remotely from your headset, up to 300 feet from your phone!
- Save desk space (mounts directly under the base of VXi's V150 wireless solution).
- Works automatically, and is easy to set up.
- Sleek and attractive, with no cable clutter.
- Available for a variety of phone systems from Avaya®, Cisco®, Polycom® and Snom™.

Works automatically with the VXi V150

Easy to connect

Mounts directly to the base of the VXi V150 to save desk space
