The perfect Partnership

Deliver a complete, cutting-edge unified communications and collaboration (UCC) solution in a single, affordable and manageable device - the SmartNode OpenScape Business Appliance.

The solution provides voice and conference services, voice mail, messaging, mobility, presence functionality and a multi-media contact center all in a reliable, fully-integrated one-box solution that offers quick and simple installation and set up.

Benefit now from comprehensive UCC capabilities while transitioning to IP telephony at your own pace. Fully compatible with OpenStage IP phones, Patton's one-box appliance with

OpenScape Business is designed with a built-in SmartNode VoIP gateway to preserve your capital investments in legacy telephony and fax devices.

Integrate existing TDM fax devices, analog POTS and digital ISDN or DECT phones with the new-generation of all-IP-based UCC services. The SmartNode OpenScape Business Appliance offers flexible combinations of FXS, FXO, BRI, and PRI telephony interfaces with the tested and field-proven interoperability of SmartNode VoIP.

This Appliance provides the ideal one-box solution for SMBs that want the productivity-boosting benefits of UCC.

OpenScape Business S- the new generation UCC software from Unify combines the best-in-class enterprise voice with full UCC functionality for up to 1'000 users and plays well with OpenStage IP phones.

A unique value proposition for small-to-medium sized business

Delivering more UCC functionality in one box for organizations with up to 1'000 users than any product on the market, the SmartNode OpenScape Business Appliance seamlessly interoperates with any TDM and/or SIP provider-network interface.

- Superior ownership experience with no rip and replace required
- Apply UCC to all users with IP Phones connected to the OpenScape Business UCC server
- Feature-rich UCC communications based on the proven Unify Voice history
- The fastest, easiest, most affordable path from any voice technology to advanced Unified Communications
- UC client available for all major mobile operating systems, including Android, iOS, Windows and more
- Web-based management tools provides simple and seamless support

Investment Protection

Use the built-in SmartNode VoIP gateway to integrate existing devices e.g. fax machines, PSTN lines with IP-based telephony for smooth migration to full-featured Unified Communications.

About Patton

Patton is all about connections. It is our joy and mission to connect real-world customer challenges with high-quality, right-priced solutions—complemented by unrivaled customer service and technical support. Incorporated 1984, Patton has built everything from micro-sized widgets that connect „this-with-that,“ to carrier-grade Telecom gear that connects subscribers to service-providers. Patton’s specialty is interconnecting legacy TDM and serial systems with new-generation IP-based voice, data, and multi-media technologies.

Headquartered in Gaithersburg, MD, USA, Patton equipment - including VoIP, Ethernet extension, and wireless router technologies -is up-and-running in carrier, enterprise and industrial networks worldwide. Patton works in connection with a growing network of technology, business, and sales-channel partners. To connect with local-market requirements, Patton operates training and support centers in Switzerland, Hungary, Lebanon, Australia, and the USA.
