XACT DIALER

Does your company do outbound message broadcast dialing? If so, XactDialer is for you. Create a broadcast campaign and choose where to route your calls. XactDialer even gives you the option to route calls to different destinations based on whether a person or voicemail answers. You can choose to receive reports on your campaign daily or after the campaign completes.

Stop dialing each individual number, and start using XactDialer to automate your outbound dialing. Contact a sales representative today to see how you can benefit from XactDialer!

Features

- ▶ Upload CSV lists
- ▶ Schedule call times
- ▶ View service call thresholds
- ▶ Complete reports on person/voicemail and duration
- ▶ Route calls based on whether a person or voicemail answers
