

JABRA NOISE GUIDE

THE POWER OF CONVERSATION

The Jabra Noise Guide signals to people in open plan offices if the noise level is too high, so they can regulate their behavior to support the overall group productivity.

It's perfect for anyone who works in an open-plan office and needs to focus. Or for those taking lots of calls in noisy environments. Our Noise Guide helps create a positive experience for those on both ends of the line.

SAY HELLO TO OUR NOISE GUIDE

For open office environments where noise control is required

FEATURES AT A GLANCE

- Lights up when noise levels rise too high so you can consider moving conversations to a private or quieter room
- Glows green when noise is low, orange when nearing a limit and red when noise is too high
- Customize your maximum noise and working space requirements

Works:

AT OFFICE DESK
