

## M10R KLE SIP DECT 4-Line Rugged Handset

The M10R KLE SIP DECT 4-Line Handset is ideal for small businesses that need to quickly and easily manage call routing. Add mobility to your SIP communications with up to 10 expandable M10R KLE accessory ruggedized handsets. With a rugged design and locking battery door the handset is built to survive drops in a busy warehouse environment and water resistant so it can last outside even in the rain. When paired with the M100 KLE SIP DECT 4-Line Base Station, each handset can have its own extension and unique phone number. With four programmable LED backlit line keys on the cordless handset, easily handle multiple calls. With key system emulation, the M100 KLE Series handles shared line appearances locally without the need for SCA (shared call appearances) support from your provider. You can even hold a call and resume it on a different handset or deskset with a single press of a button. No complicated programming required.

### M10R KLE Key Features

#### Key system emulation

Easily handle calls with shared line appearances/shared call appearance (SCA<sup>1</sup>) across all cordless phones without the need for SCA support from your provider. The M100 KLE base station handles the SCA lines locally, so you can answer, hold and resume calls on any phone at the touch of a button. You still gain the benefits of advanced SIP features like voicemail, auto attendants and DID routing from your provider.

#### Easy wireless installation

Set up your phone system in minutes. Cordless handsets and desksets can be easily paired with the press of a button. There's no complicated wiring or cabling requirements. You only need one ethernet connection and simple provision on the DECT base for easy deployment.

#### Programmable line keys

Program backlit line keys right on the cordless phone to give you one button hold and resume from any cordless handset or deskset. You can also program a line key for a private extension or other function.

#### Clear mobility with DECT 6.0 digital technology

Leave your desk without leaving your work behind. Enjoy DECT 6.0 sound quality and reception, which provides strong protection against wiretapping. DECT also ensures the best call range while not interfering with wireless routers.

#### Rugged design

Built to last, with a locking battery door, water resistant and shock absorption the handset can survive a drop in a busy warehouse environment, or outside in the rain.

#### Scalability

Growing pains? Register up to 10 cordless handsets or desksets to the M100 KLE DECT base station and program each one with its own phone number or extension.

#### HD voice quality

With G.722 wideband codec support for HD audio, calls have never sounded so rich and life-like.

#### Generous talk time

With seven days standby and nine hours of talk time, you don't have to worry about needing to charge mid-call.

#### Intuitive design

You're in business with a user-friendly interface, large backlit display, four programmable line keys, two soft keys and a navigational pad.

#### Three-year warranty

Enjoy the peace of mind that comes with an industry-leading, standard three-year warranty. Snom also provides advanced replacement on warranty claims using new, not refurbished, products.
