

M100 Key Line SIP DECT Series

The small business solution for an active, on-the-go workplace

Answering and transferring calls is easy with the Snom M100 SIP DECT Cordless Key Line Series. The cordless deskset and handset features key system emulation (KLE) for improved call handling, making it easy to see incoming calls, hold calls, and pick up a call on hold from the handset with a simple press of a button. DECT 6.0 technology allows people to move and stay connected with up to 500 feet of range.

4 LED
Line Keys

Easy to learn. Easy to use.

It's easy for your employees to handle multiple calls, and always know who's on hold and needs attention. The key-line mode of operation means someone can place a call on hold with one button, then retrieve the call from another device. The Snom M100 Series is ideal for small businesses that need an easy-to-learn solution. Pizza shops, retail stores and car dealerships find this system the perfect communications tool for their busy workplaces.

DECT mobility means increased range

With DECT technology between handsets and the M100 base station, don't worry about losing a call while walking around your workplace. The series supports up to eight SIP lines or accounts, and can handle six concurrent calls.

The small business must-have

- Easy deployment**
 Only the Snom M100 base station requires configuration by a service provider. After set-up, you can add up to ten M10 or M10R cordless handsets or M18 cordless desksets.
- Improved call handling**
 It's easy to see incoming calls, hold calls, and pick up a call on hold from the handset with a simple press of a button.
- Flexible Solutions**
 The M100 series can be configured for Key line or DECT mobility (multi-line) applications.
- Extended range**
 With up to 500 feet of range, your team can go as mobile as they need in your bustling business.
- M18 deskset**
 With the deskset's large display screen, you can access programmable feature keys and customize settings. It can be moved around whenever — and wherever — you want. No plugs or power outlet required.
- M10 and M10R handset**
 The cordless handset offers most of the convenient features you'd normally find on a desk phone. Plus, it lets you place and answer calls while you're on the move. The ruggedized M10R is ideal for warehouse, heavy use or high traffic environments.
