The Perfect Solution

SimpleWAN 250 is built to enhance the mobile and remote user experience by providing advanced SD-WAN technology combined with 4G connectivity.

This model supports roughly 500Mb of continuous throughput with all functions and features of SimpleWAN fully enabled and easily deployed through a software defined cloud dashboard.

SimpleWAN 250 has an integrated LTE radio with support for bands 2, 4, 5, 12, 13, 14, 66, 71 and two Wireless N radios (Wifi) for simple and effective deployment for any home or small office.

The SimpleWAN 250 hardware provides everything you need to extend security policies to remote networks. Featuring a complete suite of enterprise diagnostics tools bundled for plug and play applications. With the flexibility to remotely manage or automate network settings, the Platinum 250 provides all of the tools you need to lower your overall support costs and improve your customers' experience, bundled as the most comprehensive enterprise class network management solution.

Highlights

Plug and Play

Full Remote Control
