The Perfect Branch Office Solution

The Platinum 500 hardware is ideal for small branches with up to 50 users. This hardware supports roughly 500MB of continuous throughput with all functions and features of SimpleWAN fully enabled and easily deployed through software, or cloud augmented updates.

The Platinum 500 supports up to two internet connections and can be used in failover or load balancing modes. It also can support satellite 4G and 5G technologies for high availability.

Our Platinum technology is designed to be the "last box" you have to buy. This plug and play hardware gives you access to all features and functions the moment you turn it on. The only scenario in which you would ever need to replace the Platinum 500 is if you grow beyond its total throughput capabilities, at which point we have options like the Platinum 1000 that can give you what you need.

The Platinum 500 is fully stateful and has no moving parts, as well as very low power usage. A technology you can truly set and forget sounds refreshing, doesn't it?

Platinum 500

One Piece of Hardware Collapsing the Network Stack:

Wi-Fi

Firewall

Failover

VoIP

Cyber Security

Diagnostics and Monitoring

Information Compliance

Multiple Location Connectivity

Highlights

500 MB Throughput

Small Form Factor

All in One

Network Analytics & Monitoring

Advanced Firewall

QoS

Cyber Security

Ubiquity Unify Integration

HIPAA and PCI Reporting

100's of Additional Integrations

SECURITY

- Breach Notifications
- Attack Map Tracking
- Traffic Pattern Alerts
- Malware Site Blocking
- Zero Day Updates
- World Auto Breach & Block

STANDARD FEATURES

- Firewall
- Router
- Rules
- NAT
- 1:1 NAT
- DMZ
- DHCP
- VPN
- Multi-Level User Access
- Cloud Management
- Configuration Templates
- Notifications
- DyDNS
- Firewall Log
- Sync Log
- SIP ALG/Proxy
- Traffic Shaping

PHYSICAL PORTS

- 1 - WAN
- 1 - Backup WAN
- 1 - USB 4G
- 1 - Serial Diagnostics
- 1 - Reset Button
- 1 - Power LED
- 1 - Internet LED
- 1 - Active LED

COMPLIANCE

- HIPAA Compliance
- PCI Compliance
- Compliance Audit Log
- Compliance Notifications

CAPACITY

- Max Active Connections: 8,900,000
- 300 Users
- 500 Mbps Max Throughput
- 250 vMPLS Node Network
- Dual Wan Fail-over
- 1000 Mbps Connection

DIAGNOSTICS

- Advanced WAN Load Testing
- Power Supply Monitoring
- Temperature Monitoring
- Connection Speed Tracking
- MOS Score Diagnostics
- Historical Bandwidth Stats
- Jitter & Latency Tracking

TECHNICAL DETAILS

- 1GHz Quad Core AMD T40E
- 4GB DDR3-1066 DRAM
- 4GB On-Board Memory
- Dimensions 6.61" x 6.18" x 1.18"
- Fan-less / Passive Heat-sink
- 3x 1Gb Ethernet Ports
- 12v 11 Watt Power Usage
- USB for 4G LTE
